EDUCATION

MCA – Distance Learning (Feb 2023)
SASTRA University, Thanjavur
CGPA – 8.75

B.Sc. Computer Science (April 2020)
MGM's College of CS & IT, Nanded
CGPA – 8.91

AISSCE - 12th (March 2017)
Jawahar Navodaya Vidyalaya, Nanded
Percentile – 85 %

AISSE - 10th (March 2015)
Jawahar Navodaya Vidyalaya, Nanded
CGPA – 8.2

SKILLS

- ❖ **Programming languages:** Python, JavaScript, SQL, Ansible, Java, HTML/CSS
- ❖ **Database:** MSSQL, MySQL, PostgreSQL, MongoDB, OpenSearch, EDL, SQLite.
- ❖ **Tools and Frameworks:** Django, Flask, Linux, Git, GitHub, Docker, Nginx, Jenkins, AWS, EC2.

ACHIEVEMENTS

- ❖ Successful Integration of XML catalogs into core search indexes, unlocking new **aftermarket revenue** streams.
- ❖ Received Project Manager commendation for engineering a **hotspot extraction pipeline** that accelerated add to cart metrics.
- ❖ Winner of **MFDM AI Saree** contest using the Django application.
- ❖ Awarded three times with **Star employee award** for excellent Performance and teamwork.
- ❖ Received **client appreciation** for automating services on Linux using Python and Ansible.

CERTIFICATIONS

- ❖ AWS Certified Cloud Practitioner: [link](#)
- ❖ Django3: [link](#)
- ❖ Microsoft Certified: Azure Fundamentals: [link](#)
- ❖ Python3 OOP: [link](#)

LANGUAGES

- ❖ English ❖ Hindi ❖ Marathi

Mahesh Manohar Jadhav

Senior Backend Engineer with **5.9 years** of direct experience designing, developing, **testing**, and **deploying** scalable **Python backends**. Proven expertise in leveraging the **Django** framework to deliver high-quality solutions. Deployed event driven **AWS** architectures utilizing **ECS**, **Lambda**, and **OpenSearch** alongside **AWS Rekognition** to optimize enterprise search and data pipelines. Expert at collaborating with **cross functional teams** to achieve project goals. Passionate about adopting **new technologies** and staying updated with industry trends.

WORK EXPERIENCE

HCLTech (Oct 2024 - Present) (Senior Software Engineer)

- Integrated **AWS Rekognition** into legacy system, raising hotspot detection **accuracy** from **48% to 88%** via dual-source validation.
- Converted **55K+** unstructured servicing jobs from a **legacy Java** system into structured model-based data, indexed into **OpenSearch** for downstream consumption.
- Led conversion of **1,200+** Excel catalogs to **API-compatible** formats, unlocking data and driving revenue.
- Developed **Python** based PDF parsing pipelines to **extract parts** related data from pdf catalogs and convert into **CSV**, significantly improving authoring efficiency.
- Implemented **Datadog monitoring** (dashboards, alerts, tracing) to track **API latency** and failures.
- Engineered manual hotspot authoring backend (**FastAPI**) to handle complex edge cases not solvable via automation, enabling complete hotspot coverage.
- Designed and built a **scalable** image processing pipeline using **AWS Lambda**, **ECS**, & **OpenSearch** to dynamically extract and serve hotspot coordinates for catalog graphics.
- Owned **backend development** across services using **Python**, **Flask**, **AWS**, including design, development, deployment, and **production support**.
- **Automated** the deployment process by using **Terraform** and **GitHub Actions**.
- Worked on a Proof of Concept (**PoC**) integrating **Generative AI** with computer vision outputs to automate the identification and classification of legacy machinery parts.
- Participated in Agile ceremonies, contributing to **Sprint Planning**, **Backlog Grooming**, & **Daily Standups**.
- **Technical Skills:** Datadog, FastAPI, Flask, OpenSearch, Lambda, CloudWatch, CloudFront, EC2, S3, ECS, ALB, Rekognition, Textract, Agile, Terraform, IaC, Github Actions.

Tata Consultancy Services (Aug 2020 - Oct 2024) (System Engineer)

- Proficient in leveraging Django's **MVT** paradigm for developing efficient web applications.
- Hands-on experience in building and consuming **RESTful APIs** using **Django REST Framework**.
- Used Django **ORM** for efficient database query handling and seamless integration with web applications.
- Experienced in handling **authentication** and **authorization** mechanisms.
- Collaborated with the **QA** team to conduct thorough unit testing, identifying, and promptly resolving bugs.
- Developed efficient **SQL queries** to load and extract data for analysis.
- Implemented **DevOps** tools and strategies to achieve **continuous integration and delivery**, ensuring streamlined software development processes.
- Automated **Linux** services like **nginx**, **tomcat**, **httpd** using **Python** and **Ansible** along with **cron jobs** and **shell scripting**, resulting in a **60%** reduction in manual intervention.
- Streamlined the vulnerability analysis process using **Django** and **Python** scripts enabling the identification and remediation of vulnerabilities for more than **500+** servers.
- Led **CDH** to **CDP** migration, managing configuration changes, data transfer, and compatibility testing.
- Migration helped successfully improve **system efficiency** and **scalability** within project timelines.
- **Technical Skills:** Django, Hadoop, Spark, Linux, Docker, Microservices, Jenkins, Ansible, CI/CD, Tableau, MFDM, Figma.

PROJECTS

- **pgMate** (PG Accommodation Platform) | Django, Python, PostgreSQL!
 - A two-sided marketplace featuring custom dashboards for property owners and seekers.
 - Implemented **role-based** access control by extending Django's **AbstractUser** model.
 - Developed a dynamic search system to filter listings by location, price, and amenities.
 - Github: <https://github.com/ursmaheshji/pgMate>
- **Student Management Portal** (Admin Web App) | Django, Python, WhiteNoise
 - An institutional management application designed to streamline student records and notes.
 - Built a custom **EmailAuthentication** backend to allow flexible username/email login.
 - Optimized database **QuerySets** to improve load times and used WhiteNoise for **static files**.
 - Github: https://github.com/ursmaheshji/Student_Management
